

QUALITY MADE IN EUROPE

**FIAProTeam**

THE EUROPEAN PRODUCTION PROGRAM

## Designed for the ease of use

With this catalogue we attempt to create a reference book of facts and information concerning our products. To make sure you get the most out of this catalogue you will find below some helpful tips.

## The FIA recommendation chart

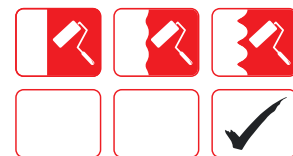

Only the combination of the right painting tool and the right paint will produce the best results. This is why we have created the FIA recommendation chart, see example on the right side of each product family. Here our technical specialists offer their considerable experience in relation to our painting tools. Maybe results will vary from country to country.

### Statement of example:

Excellent for emulsion and exterior paint,  
good suitability for latex paint  
and o.k. for primer and anti-corrosive paint.

Best used for plain surfaces.

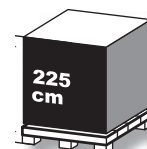

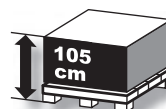

Best used for rough surfaces.

Emulsion	
Latex paint	
Exterior paint	
Plaster work	
Anti-corrosive paint	

## Order quantities explanation

An explanation of the abbreviations you will find in the charts referring to the products.

- PU**  
Packing Unit: How many products in smallest unit.
- CB**  
Covering Box: How many products placed in covering carton.
- CCG1**  
How many products on standard pallet height 105cm.
- CCG2**  
How many products on standard pallet height 180-225cm.

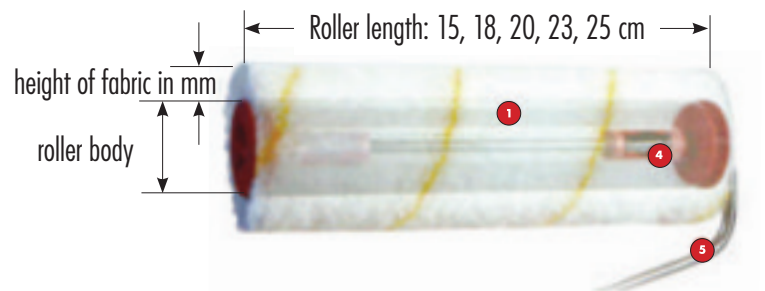

Subject to final confirmation.

## Type 41, 48, 54.

Fabric, thermobonded.

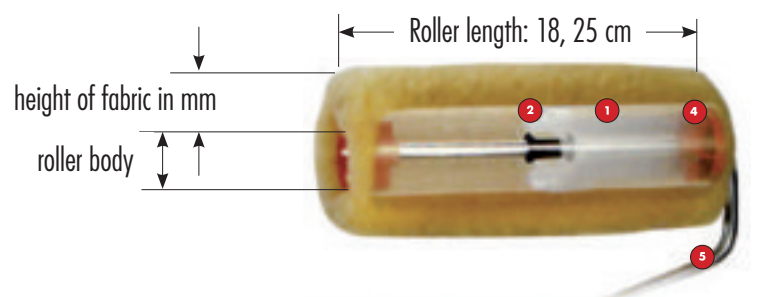

Roller body  
core-diameter in mm: 41 = Type 41  
48 = Type 48  
54 = Type 54

## Type 44.

Fabric, glued.

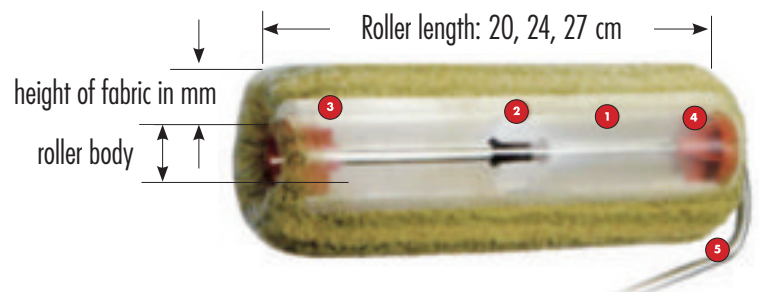

Roller body  
core-diameter in mm: 44 = Type 44 (glued)

## Type 52, 60, 68.

Fabric, padded, sewn.

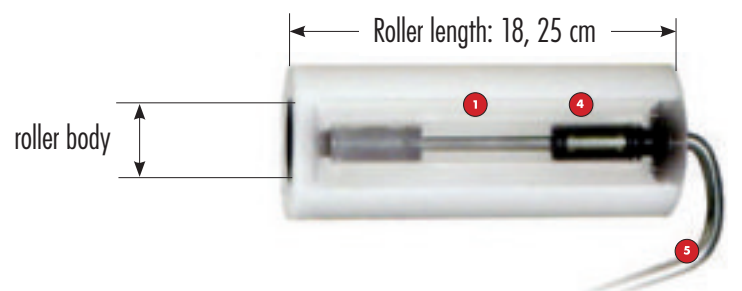

Roller body, padded.  
core-diameter in mm: 52 = Type 52 (4 mm padded)  
60 = Type 60 (8 mm padded)  
68 = Type 68 (12 mm padded)

## Type 41.

Foam / flocked foam.  
(Foam glued to full area of roller body)

Roller body  
core-diameter in mm: 41 = Type 41

- ❶ **Inner tube** Prevents ingress of paint into the roller body.
- ❷ **Bonding bush** Inside, to lock the steel in position. Made from special plastic material.  
For frames with 6 mm steel wire.
- ❸ **Padding** made of elastic special foam. Recommended for use on rough/structured surfaces.
- ❹ **Roller bearing** with retracted assembling-position including for edgerolling design.  
For frames with 6 mm or 8 mm steel wire diameter.
- ❺ **Frame** from galvanised steel wire. Diameter 6 mm or 8 mm.

Subject to final confirmation.

## The FIAProTeam packaging solutions

Good packaging should protect and present the goods. If material, function and form joins up, we reach the optimum.

FIAProTeam creates attractive packaging solutions that need a minimum of material to bring out a maximum of protection and economic viability. We are able to offer the best solution for you by also considering the needs of the country-specific markets.

10 pcs. in clam box  
(blister shell)

## The FIAProTeam packaging terms

**standard:** customary packaging of the product with label

**single pack:** one item wrapped in package

**double pack:** two items wrapped in package

**clam box:** items are packed in blister shell

**bulk:** great quantity of items packed in carton

**Large rollers:** individually wrapped in foil with label.

**Mini rollers and allrounder:** in 10- or 20-pack blister shell (clam box).

**Mini rollers and allrounder:** in single pack or double pack bag.

Packing units in double pack are always seen as one pack.  
Packing units in blister shell are counted individually.

5 pcs. in clam box  
(blister shell)

single pack:  
bag with euro-punch

double pack:  
bag with euro-punch

single pack:  
shrinked foil  
without euro-punch

individuell blister shell  
(e. g. tongue and groove roller)

# Best price-to-quality ratio

*FIA ProTeam core competence is clearly the powerful production and distribution of high quality painting tools and accessories. We are focussed on large acceptance of our goods as well as private label.*

*This allows us to offer you the best price-to-quality ratio you can get.*

Due to our own production we are able to realise customer-specific product solutions. This benefit will give your products the ability to rise above direct comparability with others in the market.

FIA is synonymus for reliability, flexibility and extremely powerful manufacturing and distribution.

Committed to your success.  
**The FIA ProTeam.**

**To be able to produce products in our own production companies means in effect we guarantee best price-quality ratio ex-production.**

Besides stable quality and best prices your benefits include:

- products ex factory
- security of supply
- ability to realise special orders or custom-made products and private label packaging
- best possible conditions due to worldwide, purchasing of raw materials.

# Your benefits due FIA ProTeam-owned production

### **The production: An essential keystone of successful global playing.**

Specialists all over the world have one thing in common: The FIA ProTeam understanding of producing the best painting applicators and preparation products you can get. This is why our customers trust us.

So if you buy a FIA ProTeam product you can be sure you made the best decision - no matter where you bought it. We built our success among many other high level quality attitudes on our market-experience and trusted partnership that has grown over decades. That is why we are able to fulfill all targets for one goal: The

### **Specialist in a multi-faceted branch.**

For the processing of materials to bring lasting improvement to facades and walls, the contractor – from painter through plasterer to floor layer – needs professional tools. And that is what we provide:

The Storch-Ciret Group is the European leader within our field and established itself in the production and sales of a comprehensive line of painting applicators and preparation products – internationally, with a concentration on Europe. With approximately 1.400 employees, we operate a total of 26 sales and production facilities in Europe and China.

With deliberate focus on the different needs of a complex branch, we take a pioneering role – and will also meet the demanding requirements of retail markets and professional endusers in future.

# How is quality created?

Quality at FIA ProTeam is a mirror image of the basic attitude of all employees – starting from management to the individual employee, who handles the products.

At FIA ProTeam, we practise this basic attitude for decades. Due to this, the know-how of the employees grows, which even crafty product pirates cannot copy. FIA ProTeam manages this know-how professionally and ensures a permanent learning and inhouse process – this is how quality is created at FIA ProTeam.

### **Looking at quality in its entirety.**

We always understand quality in its entirety. Application-related knowledge from our colour and test laboratory is applied during development of new products, as well as, knowledge of material and process technology, assembly and joining technology. Quality in customer service and administration as well as the product goes hand in hand at FIA ProTeam. We understand quality also reliability along the complete order processing, from receipt of order to the supply of customers.

### **Quality in series production.**

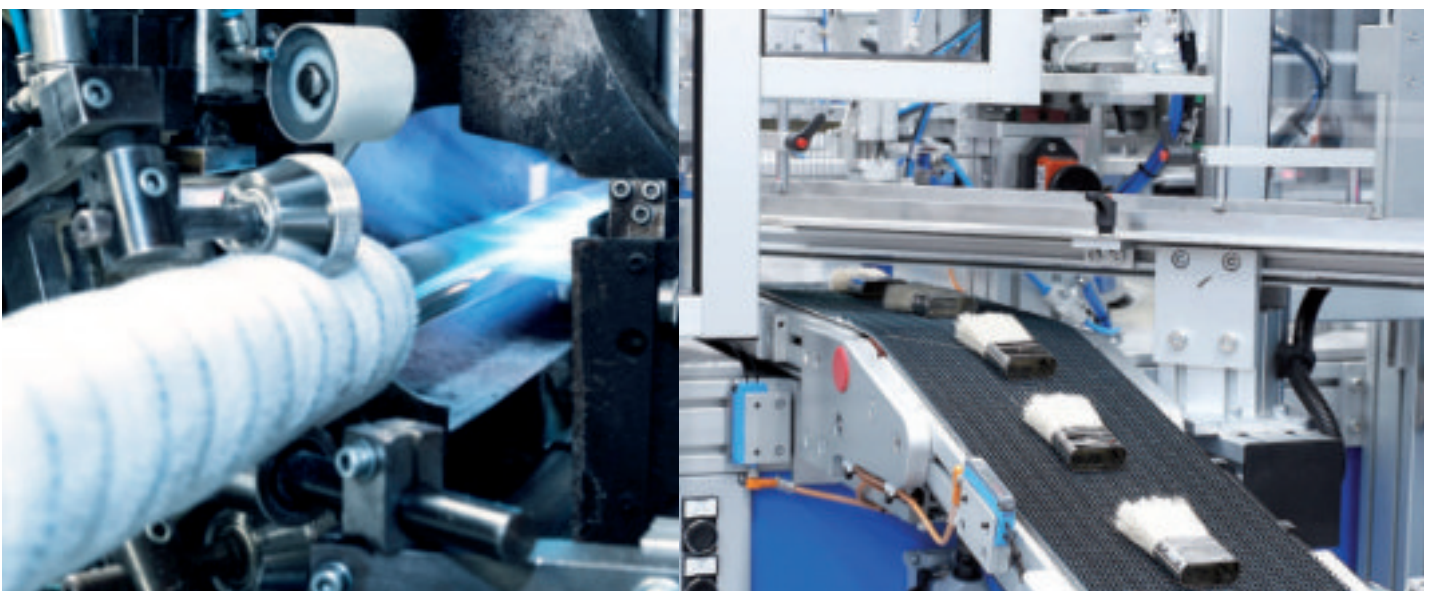

Routine quality standards of successful products, where tens of millions are supplied throughout the world, ensures of satisfied customers.

For instance: In production we effectively counteract wear of well-worn tools by regular maintenance.

### **Displaying responsibility and creating trust.**

For us, success also means orienting ourselves to superordinate goals and continuously measuring ourselves up to them. This is why the interests of our customers are always in the Centre of our operational business – without responsible conduct towards our employees, the community and the environment, we would be unable to fulfill your expectations in the long run.

Therefore, we always strive to take a holistic view which allows us to adopt a sustainable entrepreneurial approach before all else.

## Your ideas become reality!

Come to us with your ideas: We offer you our unique know-how and guarantee absolute confidentiality. To achieve the optimal result, a team of specialists works out solutions and ways to realize the product.

In this way, you get everything from one source for a development and implementation in line with market and brand conditions. Material selection, design, marketing, presentation. These and further factors decide about the success of your product. Do not leave these decisions to chance, but make them together with the specialists from FIA ProTeam.

**Phase 1:** >  
**The idea.**

The birth hour. Here, it will be determined, what the task will be in the further process. In the first place, the contents will be fixed and the basis for everything else later.

**Phase 2:** >  
**The concept.**

Here, in a project team it is broken down in detail, what and in what form it is to be realised. Already here, the idea becomes a tangible reality.

**Phase 3:** >  
**The feasibility study.**

Building on the concept, our experts will check, if and how the project can be realised.

**Phase 4:** >  
**FEM – Finite Element Method.**

With the aid of 3D designs, 3D simulations, Rapid Prototyping, Stereo-Lithography, Laser Sintering and other procedures, material properties and functions are checked.

**Phase 5:** >  
**The function analysis.**

With special test arrangements, for instance: pulling-off forces or stability characteristics are measured on the object.

**Phase 6:** >  
**The pilot run/series.**

Here, you can already hold the product ready for series production in your hands.

# Rollers

# FI Aflock super concave\*

**special foam quality**

**modified surface**

**concave end\***

## Benefits

- special foam quality
- modified surface
- concave end eliminates tram lines
- durable

\* DuPont Patent Application  
WO 2005/007302 A2

# The concave\* foam roller.

Painting a flat surface like a door without any visible roller tracks is very difficult. By using the FIA concave foam roller the result will be a smooth surface without any roller tracks.

Tests all over Europe show brilliant painting results and prove the excellent and unique quality of the concave foam roller.

- Excellent paint results due to concave rounded ends.
- 20% more efficiency due to larger roller working width than ordinary rollers.
- Easier to direct than conventional rounded rollers.
- Fast paint application without any marks or roller tracks.
- Precise corner rolling due to straight roller end.

## FIAflock super concave\*

Perfect layer thickness and fine surface in one coat.

Low solvent enamel	
Water based enamel	
Anti-corrosive paint	
Polyester paint

# Accessories

## The FIA development responsibility.

Ergonomic painting means a maximum of working comfort combined with the best materials for the human skin to work with. To get the optimal result the specialists of FIA fully must understand how the human musculoskeletal system works. This is the FIA way to create the best tools and benefits you feel every day when working with our products.

- ergonomic grip combined with well balanced frame
- relieving the joints like wrist, elbow or shoulder
- reducing fatigue due to comfortable use
- bubbleless working for the palm of hand
- robust design for long life in use
- designed to be environmentally friendly

# Brushes

## Tradition, Experience and Innovation

A long-standing history of tradition paired with our elaborate experience as a painting tools manufacturer and innovator enables us to produce the highest quality for our customers based on consumer requirements.

Our exceptionally high standard production sites and the continued focus on quality improvements make the FIA ProTeam synonymous with high quality and professional painting tools worldwide.

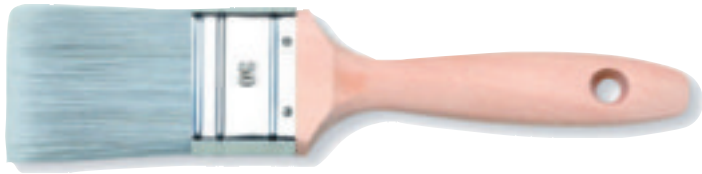

Our fully automated brush facilities in Europe and China make it possible to manufacture large-volume production with dependable quality. Here we are able to produce all shapes of flat, round or radiator brushes

Innovative 3 component handle with Grip-Zone for more ergonomcy

Available with different bristle mixes and colors

## Key Facts:

- Fully automated
- Own Bristle-Mix
- On the spot produced plastic components
- Innovator in all types of painting tools
- In-House Tech-Design competence
- Production plants in Europe and China
- Continuous development of brushes by working closely with consumers and paint factories

# Covering and Masking

Covering and masking range is shown only neutral in bulk without barcode.

Alternatively to bulk you can order all sizes as single product, shrunk in foil, barcoded.

## Kombi-Mask HDPE foil, premium

Foil-thickness approx. 0,01 mm. With rice paper extra flat, width 15-19 mm. Acrylic adhesive, medium adhesive strength. High UV resistance.

1

Package	Size	PU	CCG1	CCG2	MOQ	Art. No.
bulk	55cmx33m	5	1280	2880	1000	75011333
bulk	140cmx33m	5	800	1800	1000	75031333
bulk	270cmx20m	5	800	1800	1000	75071333

## Kombi-Mask HDPE foil, standard

Foil-thickness approx. 0,01 mm. With paper masking tape, flat creped, width 15-19 mm. Natural rubber adhesive, medium adhesive strength.

2

## Cage rollers / allrounder / small rollers types

### Type 1,75", 1,5"; cage roller.

Thermobonded.

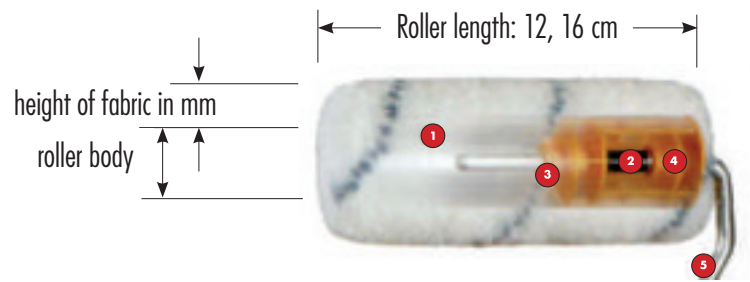

Roller body  
core-diameter in mm: 1,75" = Type 1,75"  
1,5" = Type 1,5"

### Type 30, allrounder.

Fabric, thermobonded.

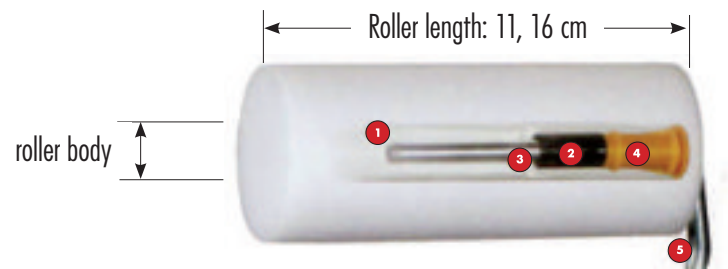

Roller body  
core-diameter in mm: 30 = Type 30

### Type 155, allrounder.

Foam / flocked foam, glued.

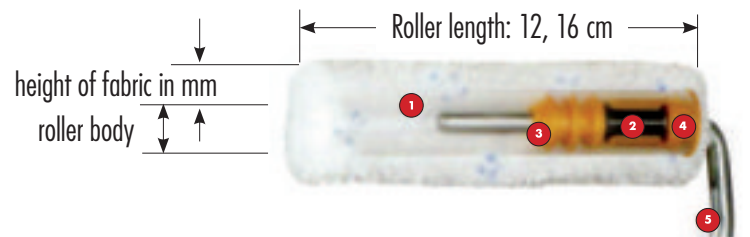

Roller body  
core-diameter in mm: 15 = Type 15

### Type 17, 15; mini roller.

Fabric, thermobonded.

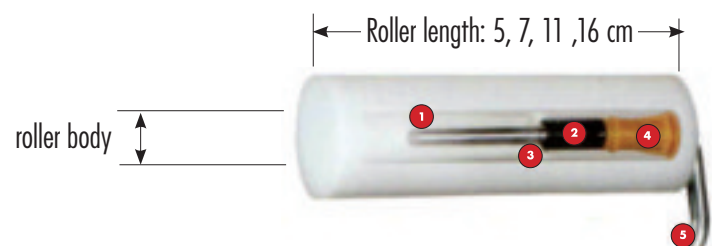

Roller body  
core-diameter in mm: 17 = Type 17  
15 = Type 15

### Type 15, mini roller.

Foam / flocked foam.  
(foam glued to full area of roller body)

Roller body  
core-diameter in mm: 15 = Type 15

- 1 **Inner tube** Prevents ingress of paint into the roller body.
- 2 **Bonding bush** Inside, to lock the steel in position. For frames with 6 mm steel wire.
- 3 **Frame centering**
- 4 **Roller bearing** with retracted assembling-position including for edgerolling design.  
For frames with 6 mm steel wire.
- 5 **Frame** from galvanised steel wire. Diameter 6 mm.

# How can FIA assist you to differentiate your products in an overcrowded market place?

Too many market participants, offering identical products to the same customers, will normally end in an aggressive price cutting with decreased margins. This can lead to a reduction of quality with inevitable long term damage to everyone's reputation.

## Creativity is the key

FIA believes that all our marketing efforts have to be concentrated on yours and your customers requirements. FIA's competitiveness and flexibility can offer you more than usual advantages.

Your potential customer groups have specific requirements which may not have been clearly identified in the past. Old marketing solutions can become as outdated as old applicator fabrics with new paints and need changing.

We think this is one reason why successful companies exist in saturated markets.

## Are you ready for a dialogue?

We would like to start a dialogue with you in order to develop new concepts for the future. The additional benefits of offering tailor-made solutions, will give your products the ability to rise above direct comparability with others in the market.

For example, by offering you a uniform design of each component such as handle, fabric, etc., the products of your brand gain a high recognition value due to a wellrounded harmonious market appearance, which is, as close as possible, orientated on your Corporate Design.

The Solutions individually tailored to your specific requirements will give your brand a strong, original presentation.

We will give your products the final touch, which can give you the deciding strategic competitive advantage.

How? You will find out in a dialogue with us.
